

## **TravelNest Coding Task**

Please write some code that scrapes property name, property type (e.g Apartment), number of bedrooms, bathrooms and list of the amenities for the following 3 properties:

<https://www.airbnb.co.uk/rooms/14531512?s=51>

<https://www.airbnb.co.uk/rooms/19278160?s=51>

<https://www.airbnb.co.uk/rooms/19292873?s=51>

Please put this into a repo and share with [ben@travelnest.com](mailto:ben@travelnest.com)

One of our Engineers will go through a code review with you and suggest an improvement or additional feature.
